

## Internet - e-Survey

### ***Measure how well you communicate and learn what is most important about the products and services you offer solutions.***

Access e-Survey lets you gather valuable information on your products, services and promotions from your customers, prospects and employees. E-Survey software enables primary users to create and score interactive quizzes, tests and surveys for obtaining opinions and measuring reader comprehension – whether it be educational subject matter, articles or promotions – quickly and cost efficiently.

Our software builds questions in any format and arranges them into organized quizzes, tests, or surveys. Functions are accomplished online in an interactive mode, which features instant display, processing, and storage of results. This allows program administrators and primary users to confirm reader comprehension and collect data for future use.

#### CAPABILITIES

- Interactive surveys, test and quizzes can be developed by various users
- Questions can be multiple choice, yes/no, true/false or open-ended for full comment.
- Administration is easily and flexible with powerful organizational tools.
- Adaptable project structure lets you modify questions in real-time, based on previous answers.
- Archive your survey documents and responses.
- E-Survey links with other resources such as Database, Content Management, and Email.
